ULTRA-EARLY HIGH OLEIC

UNVEILING OF AN ULTRA-EARLY SUNFLOWER HYBRID

- Allowing growers to capitalize on double cropping opportunities
- Introducing sunflower into new geographies with shorter growing seasons
- Providing flexible cropping options for winter wheat rotation

NEW N4H161 CL

Maturity: Ultra-Early

This ultra-early high oleic is the perfect hybrid for Northern climates with short growing seasons or in the High Plains for a double crop option. With a shorter plant height, N4H161 CL has excellent root strength and late season plant health.

MARKET: High Oleic **TRAIT:** Clearfield **DMR:** Yes

- High oleic, Beyond herbicide tolerant
- Earliest maturity in the Nuseed lineup
- Excellent yield and oil content for maturity
- Short plant height

“N4H161 CL is in a maturity class all on it’s own, making it incredibly versatile. Double-cropping, short maturity zones or late plantings are all fits for this high oleic sunflower.”

Alison Pokrzywinski
Product Development Manager, North America

HIGH OLEIC

While oleic levels can vary year to year due to environmental pressure, Nuseed sunflower hybrids target a minimum oleic level of 85% or higher, with some hybrids reaching greater than 90% oleic acid.

COBALT II

Maturity: Early

Cobalt II is an early and disease resistant high oleic hybrid. A great fit for both wet fields and late plantings, Cobalt II also delivers high yields to back it up. With excellent disease resistance including protection against multiple races of downy mildew, Cobalt II is a hybrid you can rely on.

MARKET: High Oleic **TRAIT:** Clearfield **DMR:** Yes

- High oleic, Beyond herbicide tolerant
- Excellent disease resistance
- Excellent seed set and center fill
- Shorter plant height

N4H302 E

Maturity: Medium-Early

A welcomed addition to Nuseed’s high oleic lineup, N4H302 E will not disappoint. Best suited for the northern growing regions, this hybrid performs well from east to west. N4H302 E impresses producers all season long with its early season emergence and excellent oleic content at harvest.

MARKET: High Oleic **TRAIT:** DuPont ExpressSun **DMR:** No

- High oleic, Express herbicide tolerant
- Excellent high oleic content
- Great early season emergence
- Good late season plant health

HIGH OLEIC

High oleic sunflower oil has a longer, more stable shelf-life, neutral taste profile, and heart healthy benefits that make it attractive for commercial cooking applications. The oilseed crush industry requires a minimum oleic level ranging from 82% to 85%. Some Nuseed sunflower hybrids reach oleic acid levels greater than 90%.

HORNET

Maturity: Medium

Looking for a high yielding high oleic hybrid with all-around protection? Hornet is for you. With stalk and root structures that have been proven against the elements and disease protection including downy mildew resistance, Hornet offers solid performance and profit.

MARKET: High Oleic **TRAIT:** Clearfield **DMR:** Yes

- High oleic, Beyond herbicide tolerant
- Outstanding yield potential
- Consistent oil content
- Late season plant health

NEW N4H422 CL

Maturity: Medium

Top of the rating scale for stalk and root strength, this hybrid has consistently high test weights and uniformly clean stalks. A black seed coat with above average oil content makes the N4H422 CL an ideal hybrid for the bird food or the oil crush market.

MARKET: High Oleic **TRAIT:** Clearfield **DMR:** Yes

- High oleic, Beyond herbicide tolerant
- Strong Stalk and roots
- Excellent late season plant health
- Solid test weight

N4H470 CLP

Maturity: Medium

This hybrid delivers an all around win on the farm. With excellent agronomics including solid stalks and roots, plus the added benefits of downy mildew resistance and improved weed control with the Clearfield Plus production system, growers will achieve solid yields and top-end oil content.

MARKET: High Oleic **TRAIT:** Clearfield Plus **DMR:** Yes

- High oleic, Beyond herbicide tolerant
- Clearfield Plus provides improved yield potential
- Excellent stalk and root strength
- Good late season plant health

N4H521 CL

Maturity: Medium-Late

N4H521 CL is the fullest season high oleic hybrid in the Nuseed lineup and it yields big. The oil profile combined with a nice black seed color ensures multiple market options. An excellent fit for South Dakota, the High Plains and Texas, this hybrid will help a grower succeed with its outstanding yield potential.

MARKET: High Oleic **TRAIT:** Clearfield **DMR:** Yes

- High oleic, Beyond herbicide tolerant
- Outstanding yield potential
- Full season plant health
- Great oil content and test weight

The NuSun sunflower oil profile was developed by the U.S. National Sunflower Association, in coordination with the USDA, to create an oil essential for the food industry. NuSun oil has a naturally high smoke point and does not require trans-fat creating hydrogenation to remain stable at high temperatures. It has a good shelf life and neutral taste profile making it an excellent choice for frying oil. A typical fatty acid profile is 65% oleic acid, 26% linoleic acid and 9% combined saturates.

TALON

Maturity: Early

Looking for market flexibility? Talon produces a valuable grain for the bird food market while providing growers additional marketing options for dehull or crush as required. Concerned about tough growing conditions? Talon is an early hybrid with excellent stalk and root strength. Weed pressure a problem? Talon is an ExpressSun hybrid and is a versatile solution for growers.

MARKET: NuSun **TRAIT:** DuPont ExpressSun **DMR:** No

- NuSun, Express herbicide tolerant
- Excellent hullability and meat-to-hull ratio
- Early maturity, single-cross hybrid
- Excellent root strength

FALCON

Maturity: Medium-Early

Falcon is a fiercely resilient hybrid. Strong agronomics and the ExpressSun herbicide trait make for a low management season. Easy to grow and even easier to market, Falcon consistently delivers in both yield and oil content, making it a good fit for the NuSun and bird food markets.

MARKET: NuSun **TRAIT:** DuPont ExpressSun **DMR:** No

- NuSun, Express herbicide tolerant
- Excellent stalk strength
- Consistently good yields
- Medium plant height

N4HM354

Maturity: Medium-Early

The high yield potential for this medium-early hybrid and its fit from Canada to Texas make it stand out from the rest. Great oil content, resistance to multiple races of downy mildew and strong stalks are additional benefits that make N4HM354 a must have for your farm.

MARKET: NuSun **TRAIT:** Clearfield **DMR:** Yes

- NuSun, Beyond herbicide tolerant
- Consistent yield, oil profile
- Great root and stalk strength
- Widely adapted across multiple growing regions

CAMARO II

Maturity: Medium

Camaro II is a performance hybrid, engineered to resist both wind and weather. Its root and stalk structure is enhanced with stacked disease resistance to keep sunflower growers on the road to a low management, high-yielding season. Year after year Camaro II generates high yields and profits.

MARKET: NuSun **TRAIT:** Clearfield **DMR:** Yes

- NuSun, Beyond herbicide tolerant
- Improved sclerotinia head rot tolerance
- Great stalks and late season plant health
- High yielding, uniform single-cross hybrid

CONOIL (DEHULL)

The conoil seed type is the most versatile of the sunflower seed types and offers opportunities across multiple markets including kernel, oil, confection and bird food. This seed is generally higher in oil content than confection seeds.

BADGER DMR

Maturity: Medium

Badger DMR's high yield is matched by its high test weight, a valuable quality for dehull processors. With Badger DMR there are abundant marketing opportunities, giving growers flexibility at harvest.

MARKET: Dehull **TRAIT:** Clearfield **DMR:** Yes

- Conoil, Beyond herbicide tolerant
- High yield is matched with high test weight
- Excellent hullability and meat-to-hull ratio
- Striped seed for hulling

CONFECTION

Confection sunflowers are grown to meet the specific needs of processors in the in-shell snack market. These are the familiar snacking seeds that are characteristically large and have white stripes. They are generally over half an inch in length with half their weight coming from the kernel.

PANTHER DMR

Maturity: Early

Seed Type: Long (LT)

Panther DMR offers confection growers excellent yield potential and high test weight. Known for its very early maturity and great standability, this processor preferred hybrid with downy mildew resistance is a perfect fit for northern growers.

MARKET: Confection **TRAIT:** None **DMR:** Yes

- Very high percentage of large seed
- High yield and test weight
- Shorter height, uniform plant type
- Very early flowering

AN IMPORTANT AGRICULTURAL CROP

While the vibrant, strong sunflower is recognized worldwide for its beauty, it is also an important source of healthy edible oil and protein meal. As one of the world's leading oilseed crops, sunflower oil is a valued and healthy vegetable oil. Sunflower seeds are also enjoyed as a healthy snack and nutritious ingredient to many foods.

SUNFLOWER MARKETS

OIL

Approximately 75% of sunflowers grown are utilized for the oil that can be extracted from the seeds. Sunflower oil is naturally made up of a combination of monounsaturated, polyunsaturated, and low levels of saturated fat. Oil sunflowers are generally classified based on their oleic (monounsaturated fat) content. Oil sunflowers that are not used for oil extraction purposes can also be used in producing high quality bird food.

PRIMARY CATEGORIES OF COMMERCIALY AVAILABLE HYBRID SEEDS

Nusun®: Oleic levels of 55-75%

High Oleic: Oleic levels greater than 82% (common minimum crush requirement)

CONOIL (DEHULL)

The dehull market requires processors to mechanically remove the hull and separate the kernel to be sold as a raw ingredient or roasted for snacking. The shell of conoil type sunflower seeds (a cross between confection and oilseeds) is the easiest to separate.

CONFECTION

This highly recognizable black and white seed serves as a tasty and healthy snack. Confection sunflower hybrids are planted at a lower population in the field to grow longer more plump seeds. The largest of the seeds get sold to the in-shell market, like what you eat at baseball games, while the smaller seeds are utilized in the dehull market.

Nuseed hybrids are treated with the most advanced fungicide and insecticide seed treatment to protect your seed investment.

HERBICIDE TOLERANT TRAITS

Sunflowers are a non-GMO crop. Through years of selective breeding techniques Nuseed has introgressed the Clearfield®, Clearfield® Plus and DuPont™ ExpressSun® traits into the majority of our hybrids to help growers manage weeds.

The Clearfield Production System for sunflowers provides growers with broad-spectrum residual grass and broadleaf weed control, including ACCase resistant weeds. The Clearfield system combines high-yielding sunflower hybrids with Beyond® herbicide tolerance for superior postemergent weed control in no-till, minimum or conventional tillage systems.

To help maximize sunflower yield, rely on the new Clearfield Plus Production System for sunflower. When paired with Beyond herbicide and performance-enhancing methylated seed oil, growers can better manage some of the toughest weeds in their fields.

ExpressSun® trait

DuPont ExpressSun sunflower hybrids are tolerant to Express® herbicide. This revolutionary production system offers broad-spectrum control or suppression of broadleaf weeds, a simplified approach for enhanced weed control in sunflower and improved yield potential for a cost-effective crop management solution with complete re-cropping flexibility the following year.
