

SD TITAN SPRING OATS

Strengths

- Very good Straw strength
- Forage Production
- Highest percentage of Groat

Suggested Uses

- Forage or hay production
- Grain production / Straw
- Cover Crop / Nurse Crop
- Nutrient Scavenger

SD Titan is a new oat variety from South Dakota as Goliaths replacement. Relative to Goliath, Titan is higher in yield and forage dry matter yield. It also is one inch shorter and one day earlier in relative maturity. It is a great option for forage production!

AGRONOMICS

Red Leaf	MR
Smut	MR
Crown Rust	R
Height	39"
Straw Strength	Excellent
Protein	Med High
Test Weight	Good

Score

MS= Moderately Susceptible R=Resistant MR=Moderately Resistant

Plant Characteristics

Days to grazing	45-55
Days to Cutting	65-70
Min./Max. Soil pH	5.5-7.0
Palatability	Sweet
Avg seed count / lb	15,000
Seeding Rate	60-90#
Fertilize	75-125lbs N/Ac

- Best Harvested @ Boot Stage
- Plant at 38 °. Frost tolerant to 15 °
- Begin grazing @ 6-8" tall
- Cut for hay in 8-10 weeks
